Muhammad Fachry Alfareeza

SOFTWARE ENGINEERING | DATA ANALYSIS

Yogyakarta, Indonesia | +62 821 3240 5263 | fachryalfareeza@gmail.com | LinkedIn | GitHub | Portfolio

01 PROFESSIONAL SUMMARY

Information Engineering undergraduate at Universitas Gadjah Mada with hands-on work across web applications, data workflows, geospatial dashboards, and applied AI. Builds practical prototypes using Python, TypeScript, React, and FastAPI, and is interested in software engineering and data analysis roles.

02 TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, C++, C#, Kotlin, SQL / PLpgSQL

Software: React, FastAPI, REST APIs, HTML/CSS, Git

Data: Pandas, NumPy, scikit-learn, statsmodels, data cleaning, exploratory data analysis, regression, data scraping

Areas: Geospatial analysis (H3), AI applications, dashboard development

03 EDUCATION

Universitas Gadjah Mada | B.Eng. candidate, Information Engineering | Yogyakarta, Indonesia | Aug 2024 - Present

Cumulative GPA: 3.07/4.00

Kirikkale University | Electric and Electronic Engineering exchange | Kirikkale, Turkiye | Feb 2026 - Jul 2026

GPA: 3.34/4.00 | Turkey International Exchange Scholarship, fully funded

04 EXPERIENCE

Artificial Intelligence Talent Factory (AITF) | Researcher | Yogyakarta, Indonesia | Aug 2026 - Present

Collaborate on team-based research applying AI to real-world problems.

UGM Blockchain Club | Lead Researcher | Yogyakarta, Indonesia | Nov 2025 - Present

Research blockchain topics for club publications and contribute to national and international blockchain community engagement.

05 SELECTED PROJECTS

WeBank-AI | Python, FastAPI, React, Qwen2.5 | FinTechathon 2026

Built an event-driven AI banking-agent prototype for MSME micro-loan assessment from daily cash flow, with DSCR risk scoring, HMAC privacy proofs, prompt-injection defenses, and data-purging controls.

InaFlews | TypeScript, H3 | Geospatial dashboard mockup

Designed a hex-grid dashboard concept to explore locations with elevated flood and landslide risk. Code: github.com/FachryAlfareeza/InaFlews | Demo: fachryalfareeza.github.io/InaFlews.

AirQuality_Report | Python | Data workflow

Demonstrated preprocessing and combining data from multiple weather APIs.

IETO-Dashboard | TypeScript | Energy dashboard mockup

Created a monitoring dashboard concept for renewable and non-renewable energy generation.

06 ORGANIZATIONS & LEADERSHIP

University and technical organizations

- UGM Blockchain Club — Lead Researcher (2025-Present); Night Login — Cybersecurity Division Member (2025), Publication Staff (2026-2027).
- KMTETI — Infokom Videographer (2025); Jamaah Shalahuddin — Media Center, Publications (2025-2026); Komunitas TIK UGM — Game-Lab Member (2025).
- Find IT and Technocorner — Liaison Officers (2025); Enforian — Head, Logistics and Technical Subdivision (2024).

Earlier leadership

- Alpharabius Santri Language Learning Center — Co-Founder and Head of Media (2023-2024).
- BillHaq Magazine — Editor-in-Chief (2024-2025), Layouter (2021-2025); Solusi Magazine — Article Division (2022-2023).

07 TRAINING, AWARDS & LANGUAGES

Training: Associate Data Scientist + Python, Digital Talent Academy / Digital Talent Scholarship (31 hours, 2026); DataCamp coursework: Python data cleaning, exploratory analysis, statistics, regression, dimensionality reduction, and data engineering (2025-2026); QBronze and QCobalt, QWorld.

Awards: Bronze Medal, SEA Quantathon (2026); finalist, Pekan Ilmiah Nasional GFT Competition (2025); silver medal, Hong Kong International Science Olympiads (2024); finalist, National Science Olympiad Astronomy (2023).

Languages: Indonesian (C1), English (C1), Turkish (A1), Arabic (A1).
